

EXECUTIVE SUMMARY

The Virginia Department of Rail and Public Transportation (DRPT) sponsors the Tier II Group Transit Asset Management (TAM) Plan and developed the FFY2026 - FFY2029 plan in collaboration with thirty-four rural and small urban transit agencies throughout Virginia. These agencies are located across the Commonwealth and have a combined total of 1,490 vehicles and 51 facilities.

Transit Asset Management is an approach that uses the condition of assets to guide the optimal prioritization of funding to keep transit networks in a state of good repair. In accordance with FTA guidance, this TAM plan covers a four-year period FFY2026 through FFY2029 and includes all required TAM elements for Tier II providers:

1. An inventory of capital assets
2. Condition assessment of assets
3. Use of a decision support tool
4. Prioritization of investments
